Abstract (en)

[origin: EP3085857A1] The invention relates to a multifunctional column for urban use, which includes: a one-piece metal body (1) which is hollow, provided with a lower segment (2) having a quadrangular section and an upper segment (3) consisting of two tubular elements (31, 32) which are quadrangular and parallel, form a clevis, and define an intermediate opening (33) that is open toward two opposing sides; said tubular elements (31, 32) having two surfaces facing one another in which inspection windows provided with exchangeable inspection covers are defined; and mountings (63) suitable for being mounted at various heights in the intermediate opening (33) of the upper segment (3) of the column (1) and for securing the various lighting and/or communication elements (51, 52).
