Abstract (en)  
[origin: KR20160125900A] The present invention provides an exhaust gas purification device capable of realizing a compact size and an exhaust line including the same. According to the present invention, the device (1) comprises: a first purification member (20) including a first envelop (28); a second purification member (24) including a second envelop (34); and a volume (40) to connect a first outlet (32) to a second inlet (36). The first and the second purification member (20, 24) are substantially placed in parallel with each other. The volume (40) is limited by a crucible type cover (92) directly combined with the first and the second envelop (28, 34).

Abstract (fr)  
Le dispositif de purification (1) comprend : - un premier organe de purification (20) comprenant une première enveloppe externe (28) ; - un second organe de purification (24) comprenant une seconde enveloppe externe (34), les premier et second organes de purification (20, 24) étant disposés côte-à-côte et sensiblement parallèlement l'un à l'autre ; - un volume (40) raccordant fluidiquement la première sortie (32) à la seconde entrée (36). Le volume (40) est délimité par un couvercle (92) en forme de coupelle rapporté directement sur les première et seconde enveloppes externes (28, 34).
