Abstract (en)  
[origin: US2016305445A1] The invention relates to a multi-stage centrifugal pump with a foot part (2), a head part (14) and a wall part (16, 16') which connects the foot part (2) to the head part (14) and which peripherally surrounds the pump stages at the outer periphery. The centrifugal pump moreover comprises a motor stool connecting to the head part (14) and for receiving an electric motor (20) provided for the drive of the centrifugal pump. The wall part (16) projects in the axial direction beyond the head part (14) and is connected to the motor stool (FIG. 1).
