Abstract (en)  
[Solution] Switch structure 1 for switching between electrical connection and disconnection of fixed contact 223 and wire 2 includes: switching element 300 made of sheet metal and including movable contact 310 which comes into contact with and separates from fixed contact 223; and first terminal member 110 made of sheet metal and including first portion 111 which includes a pivot portion serving as a pivot on which switching element 300 swings, and second portion 112 with which the wire comes into contact, wherein the sheet metal of first terminal member 110 is metal plate 110M having first surface S1 and second surface S2 opposite first surface S1, and first surface S1 includes a surface of first portion 111 with which switching element 300 is in contact at the pivot portion, and a surface of second portion 112 with which wire 2 comes into contact.
