Abstract (en)

[origin: WO2015096877A1] Disclosed is a flame-resistant closure piece that is adapted to a corresponding closure piece such that a detachable closure is formed. Said closure piece comprises a least one flat basic fabric (14) consisting of warp threads (10) and weft threads (12), and functional elements (18) that protrude on the front side of the basic fabric (14). The basic fabric (14) is provided with a flame-resistant finish. The disclosed flame-resistant closure piece is characterized in that the basic fabric (14) and the functional elements (18) are predominantly, preferably entirely, made of flame-resistant plastic materials.
