Abstract (en)

[origin: WO2015096917A1] The present invention relates to a household appliance (1), for example a dishwasher, comprising a control panel (2), a touch screen (3) that is disposed on the control panel (2) and that enables the program parameters to be determined and displayed, and a control unit (4) that enables the child lock function to be activated or deactivated by means of a key combination formed by determining a touch geometry on the touch screen (3).
