Abstract (en)

[origin: WO2015097488A1] Method for regulating at least one of the parameters (a) of a method for the hot-rolling of a part-finished metallic product through at least one stand of rolls of a rolling mill comprising at least two working rolls, the regulating method comprising the following steps of calculating a forward slippage ratio (FWS) using the following equation:  $FWS = (a)$  where  $v_{out}$  is the speed of the part-finished product leaving said stand and  $v_{stand}$  is the linear speed of the working rolls; calculating an estimate of a coefficient of friction ( $\mu_{actual}$ ) as a function of a measured value of the clamping force (F) of said working rolls in the stand and of the forward slippage ratio (FWS) previously calculated; and regulating at least one of the parameters (a) on the basis of the calculated estimate of the co-efficient of friction ( $\mu_{actual}$ ). Associated rolling method, associated rolling mill and associated computer program product.
