Abstract (en)

[origin: WO2015074644A1] The invention relates to a method for producing a packaging (100), particularly a film packaging with a bubble-like receiving chamber (120), particularly for producing a blister pack, and comprising the steps of: overlapping at least two film elements (110), shaping at least one receiving chamber (120) for receiving at least one object to be packaged between the overlapping film elements (110), and connecting, particularly by means of at least one sealing weld, the at least two film elements (110) along a common sealing edge region which runs at least around some sections of at least the receiving chamber (120), in order to seal off said receiving chamber (120), the two film elements (110) being designed to be clearance-free on the sealing edge region from which they project, and opening means (200) being provided which allow simplified access to the receiving chamber (120).
