Abstract (en)
[origin: WO2015192159A1] The invention relates to a solar lens panel (2) comprising a number of light collecting elements (2) placed next to one another and a number of light guides (4) corresponding to the number of light collecting elements (3); one light guide (4) including a light incident surface (5) is assigned to each light collecting element (3), and each light guide (4) is retained in a holding element (14) at a distance (8) from the light collecting elements (3); said distance (8) between the light collecting elements (3) and the light incident surfaces (5) of the light guides (4) corresponds at least approximately to the focal length of the light collecting elements (3). The light incident surfaces (5) of the light guides (4) are located inside the holding elements (14).
