Abstract (en)
[origin: WO2015096865A1] The present invention relates to a door (1) for use in a household appliance, in particular an oven. The door (1) comprises an outer glass pane (2), an inner glass pane (3), a frame (4) for holding the outer glass pane (2) and the inner glass pane (3) and an intermediate glass pane (5) which is arranged between the outer glass pane (2) and the inner glass pane (3), wherein two mounting elements (6) each having a guide (7) for slidably receiving and supporting upper corners (8) of the intermediate glass pane (5) respectively, wherein the two mounting elements (6) are separately provided from the frame (4), and wherein the two mounting elements (6) are respectively embedded into a pair of openings (9) which are formed into opposing lateral sides (10) of the frame (4).
