Abstract (en)
[origin: CN106073633A] The invention relates to a vacuum cleaner nozzle base which comprises the components of at least one suction pipe (10) for ground; a front flat part which has a length (L1) of 3.5mm-4.5mm in a cross section of a plane that is perpendicular with the suction pipe (10) and is configured in front of at least one suction pipe (10); and a back inclined part which is configured behind the suction pipe (10). The vacuum cleaner nozzle base is characterized in that in the cross section, the back inclined part has a length (L2) between six times and seven times of the length (L1) of the front flat part.
