Abstract (en)
[origin: EP3088172A1] A compression press comprising: -a first support (21) suitable for supporting a first half-mould; -a second support (22) suitable for supporting a second half-mould, said second support (22) being opposite the first support (21); the first and the second support (21, 22) being capable of being brought towards and/or away from each other; -at least a first, a second and a third electric motor (31, 32, 33) that control the movement of the first and the second support (21, 22) towards and away from each other. the first, the second and the third electric motor (31, 32, 33) act in a first, a second and a third zone (211, 212, 213) of the first support (21), respectively.
