Abstract (en)  
[origin: CN106081239A] An apparatus for orienting and gripping a bag is provided with a positioning stop for positioning a side edge of a bag and a gripping component for grasping a side of a bag adjacent to the positioning stop. The gripping member has a gripper stopper portion and is movable from an initial position to a gripping position for gripping the bag in which the gripper stopper portion is positioned at a predetermined position from the stand-by position before the positioning stopper portion is located after the positioning stopper portion from the accurate position.
