Abstract (en)
[origin: CN106087290A] The invention discloses a sewing machine having a stitch track forming tool which can generate a seam in sewing material part. A needle lever belongs to the stitch track forming tool. An arm shaft (9) is intended for driving the stitch needle lever. A stitch track loosening pin (10) is intended for loosening the seam during sewing. The stitch track loosening pin is driven by the stitch track loosening drive apparatus (11), thus the stitch track loosening pin (10) reciprocates in the direction across the seam. The arm shaft (9) is part of the stitch track loosening apparatus (11). The stitch track loosening apparatus achieves simplified driving of the stitch track loosening pin.
