Abstract (en)
[origin: WO2015101877A1] A dishwasher rack accessory comprises a tray having an elongated body (20), with a grid-like bottom (21) and a peripheral wall (26) that define a supporting space (27, 28) for items to be washed, and with a releasable coupling guide (29) in each of two opposite end parts of the tray body (20), for removable coupling to a dishwasher rack (8; 8'). The tray body (20) has a handle (30) defined in each of the two opposite end parts, for the lifting of the tray, and has lower rests (31) to keep the grid-like bottom (21) in a raised position with respect to a generic resting surface of the tray, when the latter is removed from the dishwasher tray.
