Abstract (en)  
[origin: WO2015101666A1] The present invention belongs to the field of virus and virus-like particles (VLPs) as is related to VLPs derived from Triatoma virus (TrV) comprising a heterologous polypeptide, a process for obtaining a Triatoma virus VLP modified to express a heterologous protein of interest, polynucleotides comprising the necessary elements for generation of recombinant TrV virions and the process for obtention of said polynucleotides. The invention relates as well to a process for obtaining infectious TrV particles.
