Abstract (en)

[origin: WO2015144416A1] The invention relates, inter alia, to a vehicle, in particular rail vehicle (20), with a passenger region (40) and a luggage region (30). According to the invention, it is provided that the passenger region (40) and the luggage region (30) are separate, and there is at least one luggage input device for transferring luggage from the passenger region (40) into the luggage region (30), and there is at least one luggage output device for transferring luggage from the luggage region (30) into the passenger region (40), and the luggage region (30) is equipped with a luggage transport device (70) which, when an item of luggage (50) is released from the luggage input device, transports the respective piece of luggage (50) to a storage point (90) of the luggage region (30) and, when there is a return request at the luggage output device, transports the respective item of luggage (50) to the luggage output device.
