Abstract (en)

[origin: WO2015101388A1] The invention relates to a laundry treatment apparatus (2) comprising a control unit (16), an apparatus cabinet (3), a laundry treatment chamber (8) for treating laundry using process air (A), a process air circuit for circulating the process air (A), a heat exchanger (38) arranged in the process air circuit for cooling the process air (A) and condensing humidity from same, a condensate collector (32) assigned to the heat exchanger (38) for collecting condensate (C) condensed at the heat exchanger (38), a fluff filter (36) arranged in the process air circuit upstream the heat exchanger (38) for filtering fluff from the process air (A) passing the fluff filter (36), a washing liquid collector (34) assigned to the fluff filter (36) and being adapted to collect washing liquid (L) from the fluff filter (36), an intermediate tank (60) for storing condensate (C) for washing the fluff filter (36), a condensate pump (52) in liquid connection to the condensate collector (32) and being adapted to convey the collected condensate (C) into the intermediate tank (60), a washing pump (64) in liquid connection to the intermediate tank (60) and being adapted to convey the stored condensate (C) from the intermediate tank (60) to the fluff filter (36) for washing at least a portion of its surface by removing fluff.
