Abstract (en)

[origin: WO2015101892A1] The invention relates to a washing/drying machine equipped with a system to prevent the drying air filter (26) from being clogged by the filaments coming off garments during the washing/drying cycle. To this aim, a cleaning device (30) is provided at the filter location, said filter having nozzles (31) spraying water against the filter (26) to remove the filaments that have built up thereon.
