Abstract (en)  
[origin: WO2015075403A2] The present invention concerns a fog generating device (1) comprising at least: -an enclosure (2), -an air inlet (3) of which the axis XX' is substantially horizontal, -an air outlet (4) provided opposite and substantially coaxial to said air inlet (3), -air circulation means (5) capable of creating an air flow between said air inlet and outlet (3, 4), and -a tank (6) disposed inside said enclosure (2) containing a product (7) in liquid form and fog generating means (8) capable of generating droplets of said product (7), said fog generating device (1) being remarkable in that it comprises calibration means (9) forming a baffle capable of calibrating said droplets, said calibration means (9) being disposed inside the enclosure (2) between said air inlet and outlet (3, 4).
