Abstract (en)

[origin: WO2015101871A1] A household appliance, in particular a laundry washing or drying machine, comprising: operating means (10) for executing a plurality of work cycles; a memory (20) containing data (D) for executing said work cycles; a control unit (30) configured for selecting, in said memory (20), data associated with at least one determined work cycle and for controlling said operating means (10) in order to execute said determined work cycle on the basis of said selected data; a user interface (40) configured for guiding a user to enter values (V) of a set of parameters (P), said control unit (30) being configured for selecting said determined cycle as a function of the values (V) entered by the user.
