Abstract (en)

[origin: CN106115077A] The invention relates to a labeling machine used for installing a handle on a PET container, especially relates to a labeling machine used for labeling the PET container. The labeling machine comprises a container input part, a conveying unit having a plurality of rotating discs used for aligning the container, a labeling machine group, and a container output part. An outer periphery of a conveying unit is provided with a handle supplying device used to install the handle on the container.
