Abstract (en)
The present invention relates to a cooling box (1) and a method for safely transporting heat-sensitive products (2) in a transport vehicle (3) and/or for distributing heat-sensitive products (2) to final customers. The cooling box (1) according to the invention comprises a thermally insulating cuboid housing (7) with a commissioning opening (8) on an upper side (11), a first (9) and a second (10) storage chamber designed for different temperatures, a cover (12) to open and close the commissioning opening (8) of the housing (7), the cover (12) containing an integrated cool pack (13) to be cooled down, filled or exchanged in a supply center (32). Preferably, the cooling box (1) comprises a profiled outer bottom plate (20) to cooperate in a form locking manner with a certain underlying raster (5; 29), and a profiled outer cover plate (21) to carry other transport containers (30).
