Abstract (en)
[origin: WO2015104566A1] The TOI-BLANKET is a toilet foil wherewith the user can fully separate himself from a toilet during use to prevent physical contact. The equipment consists of four main parts: • Part 1 : a seat surface, • Part 2: an outer apron that covers a front of a bowl and is connected to the seat surface, • Part 3: an inner apron that prevents inside contact and is also connected to the seat surface, • Part 4: a "fixing mechanism" that is a folding-back mechanism, which can be hooked on a lower frontal portion of a bowl and under a back of a toilet seat. In an alternative, the fixing mechanism is an adhesive line, which is on the back side of the seat surface in order to fix the foil to a toilet. The whole foil is made of plastic which melts fully in water after use. The toilet foil TOI-BLANKET is compact as a finished product when it is folded and packed, so that it can be easily sold from vending machines.
