Abstract (en)
[origin: WO2015104222A1] The invention relates to a toy for playing back music or a narrated story, comprising a loudspeaker or a loudspeaker terminal, a sensor that can detect, within an area of the surroundings of the sensor, a property or a change in a property of said surroundings, and a control unit that can trigger the loudspeaker or the loudspeaker terminal to play back the music or the narrated story, which takes at least 10s to play, when the sensor detects, within the area of the surroundings of the sensor, a certain property or a certain change in a property of the surroundings or when the control unit detects a certain change in the property detected by the sensor.
