Abstract (en)

[origin: WO2015158380A1] The invention relates to an actuator which is provided for switching a switching unit and has a mechanical display, the mechanical display having a window (13) and a display surface (2) visible through said window (13). The invention is characterized in that the display surface (2) is positioned at a guiding projection (4), and the guiding projection (4) is subjected to a force from an elastic element (3, 15, 19, 21).
