Abstract (en)
[origin: WO2015104093A2] An insulating segment (10) for a winding (20) of an electric motor is characterized in that the insulating segment (10) comprises a retaining element (1) which is formed from a deformable material, the retaining element (1) allowing at least part of the winding (20) to be arranged on the insulating segment (10) in a substantially stationary manner.
