Abstract (en)

[origin: WO2015104180A1] The invention relates to a method for releasing at least one function of a control device (4), in particular a control device (4) of a motor vehicle (2), having the following steps: a) generating a random value in the control device (4); b) calculating a reference value from the random value using the control device (4); c) transmitting the random value to a remote control device (5) and from the remote control device (5) to a server (8); d) checking the authorization of the remote control device (5) transmitting the random value using the server (8) and if an authorization of the remote control device (5) is provided: e) generating a response value from the random value using the server (8); f) transmitting the response value to the remote control device (5) and from the remote control device (5) to the control device (4); and g) comparing the response value with the reference value and, if the response value matches the reference value, releasing the at least one function of the control device (4).
