Abstract (en)

[origin: WO2015104279A1] One aspect of the invention provides a housed operating device for operating lighting means, preferably LEDs, said housing which is preferably sealed against humidity having means for the mechanical positioning and/or mounting of at least one communications adapter, the means being arranged on the housing such that a positioned and/or mounted communications adapter is wirelessly supplied with energy through the housing wall and communicates with an interface inside the housing.
