Abstract (en)

The present invention refers to the field of cardboard containers, typically made from covered cardboard, and specifically its object is a method for making a casket-like container with such material, i.e. a container having base and cover able to be hingeably articulated and with the internalarticulation axis of the hinge staggered towards the inside. The invention extends to a casket-like container thus obtained, mainly intended for use as packaging box for precious objects such as jewels and watches.
