Abstract (en)

[origin: CN106152671A] The present invention relates to a household refrigerator, comprising housing, an inner container is arranged in the housing. The inner container is limited by the wall and configured for a food receiving chamber. The household refrigerator has a plate putting piece arranged on the first side wall of the inner container and configured for putting and guiding the plate. The household refrigerator further has a container putting piece arranged on the first side wall and configured to put and guide the container. The container putting piece and the plate putting piece are arranged with each other, are separated in the intervals and are parallel with the direction of the plate putting piece. The plate putting piece and/or the container putting piece are integrated in the first side wall. The present invention further relates to the method for producing and fitting the household refrigerator and a method with the receiving chamber of a receiving piece.
