Abstract (en)
[origin: CA2983554A1] The invention relates to a device for packaging medication portions having improved cleaning possibilities. The device comprises a frame structure, on which a guide unit is fastened, a plurality of storage and dispensing stations having a supply store and a dispensing station having a medication dispensing channel, a holding unit having a plurality of mounts, wherein the guide unit is removably arranged on the frame structure and the holding unit and the frame structure are fastened on or in the device such that the holding unit and the frame structure are movable relative to one another such that the guide unit can be accessed from outside the device in an access position.
