Abstract (en)
[origin: WO2015107306A1] Fluid product reservoir (R) comprising a neck (12) that defines an opening into which a closure (3) is inserted, characterized in that the closure (3) is movable by sliding in the neck (12) between a top closed starting position, in which the closure hermetically seals the opening in the neck (12), and a bottom open end position, in which at least one supply passage (34) connects the interior of the reservoir (R) to the exterior.
