Abstract (en)

[origin: US2015197324A1] A bodysuit includes at least one seal component formed from a polymeric material located at one or more bodysuit openings and configured to engage with and may form a seal. The at least one seal component is configured to form a comfortable seal against a wearer's associated body part that is strengthened upon subjection to a pressure differential that may otherwise force liquid or atmosphere from the environment past the seal and into the bodysuit.
