Abstract (en)

[origin: WO2015104498A1] The invention relates to an internal combustion engine comprising at least one cylinder that is horizontal or inclined below the horizontal plane, including a cylinder head (1) provided with lubrication means, and a distribution system. The cylinder head (1) comprises an oil return pump drawing the oil into the low point of the cylinder-head cover (18) and discharging the oil towards the main crankcase of the engine.
