Abstract (en)
An assembly toy includes first, second and third units (1, 2, 3). Each of the first and second units (1, 2) is substantially flat and elongated when the assembly toy is at a pre-assembled state. The third unit (3) has a main portion (30) and two spaced-apart connecting portions (33) extending from an edge of said main portion (30). The third unit (3) is substantially flat and elongated when the assembly toy is at the pre-assembled state. Each of the first, second and third units (1, 2, 3) is folded into a rectangular hollow prism when the assembly toy is at an assembled state. The second unit (2) has two opposite decorating parts (21) and is sleeved in the first unit (1) in such manner that the decorating parts (21) are exposed from the first unit (1) when the assembly toy is at the assembled state. The connecting portions (33) of the third unit (3) are coupled to the first unit (1) when the assembly toy is at the assembled state.
