Abstract (en)  
[origin: CN106167950A] The invention relates to a material winding device for uncoiled knitted fabric webs and for tubular knitted fabric webs. The material winding device is provided with a vertical axis of rotation (D) which can be arranged coaxially to the axis of rotation of a circular knitting machine, and a winding rod (11) for uncoiled knitted fabric webs and a winding rod (21) for tubular knitted fabric webs (22), wherein the winding rod (21) for tubular knitted fabric webs (22) can be arranged in a horizontal position which is further from the vertical axis of rotation (D) than the winding rod (11) for uncoiled knitted fabric webs (12).
