Abstract (en)
[origin: CN106102460A] A portable cryogenic workstation includes a housing having an internal cavity configured to hold one or more samples, a lid for sealing the internal cavity such that the portable cryogenic workstation is configured for transporting samples between about room temperature environments to about ultra-cold environments, at least one automation interface disposed on one or more of the housing and lid and configured for engagement with automated handling equipment, and a process data capture unit coupled to the housing and configured to capture process or ephemeral data corresponding to a predetermined processing characteristic (s) of at least one of the samples coincident with presence inside the portable cryogenic workstation.
