Abstract (en)

The invention relates to a mould (1) for producing concrete tubes, which mould (1) comprises: - a base frame (2) with a support surface; - at least one elongate core (3) arranged to the base frame (2) and perpendicular to the support surface; - one partitioned shell (6, 7) arranged around the at least one elongated core (3), which one shell (6, 7) is detachable arranged to the base frame (2); and - at least one flexible joint arranged between each elongate core (3) and the base frame (2) to allow tilting of the elongate core relative to the perpendicular direction from the support surface.
