Abstract (en)
[origin: EP3098173A1] A station (1) for closing a covering for blocks (A) made of deformable material, which comprises a resting surface (2) for at least one block (A); the station (1) comprises at least one clamping pusher (3a, 3b), which is aligned with at least one head (B) of the block (A) and can translate toward the surface of the block (A) until it is pressed for the compression of a covering sheet (4) on the block (A), and comprises grip means (5) for retaining juxtaposed end flaps (4a, 4b), (4c, 4d) of the sheet (4) that protrude from the block (A), the grip means (5) being able to translate according to a stroke for approach/spacing apart with respect to the block (A) in order to pull the sheet (4).
