Abstract (en)
[origin: EP3098267A1] The present invention relates to a curable composition containing an organic polymer containing a reactive silicon group (A), and a bound substance of kaolinite and quartz (B). The curable composition of the present invention has high environmental compatibility and cures at room temperature, and a cured product obtained therefrom affords a cured product having high water-resistant adhesiveness, preferably a cured product having high strength and high water-resistant adhesiveness.
