Abstract (en)
An improved turbine with shorten start-up, restart and shutdown duration is disclosed in the present invention. The improved turbine comprises at least one turbine casing (102) and at least one fluid carrying chamber (110). The at least one fluid carrying chamber (110) encloses at least one part of the at least one turbine casing (102) and one or more components, other than the at least one turbine casing, of the improved turbine.
