Abstract (en)

An indoor unit of air conditioner, and the air conditioner are provided. The indoor unit includes a human detection sensor for detection of a predetermined range, and a plurality of desired ranges by using general purpose human detection sensors and lenses. The indoor unit of air conditioner includes a plurality of outlet ports through which air is blown to an interior of a room in different directions, and a human detection unit for detecting a human in the room. The human detection unit includes a plurality of human detection sensors installed in the plurality of outlet ports correspondingly, and lenses provided for the human detection sensors, respectively. The plurality of human detection sensors detect ranges corresponding to the different outlet ports, respectively.
