Abstract (en)  
[origin: EP3098909A1] The present invention relates to a push-in outlet system for user connectivity to various types of accessible networks such as computer network, satellite, television and radio. In particular, the present invention relates to a push-in outlet 10 featuring an exchangeable functional module 12 arranged in an interface 11 and where various embodiments of the functional module 12 may comprise various signal processing and determine the type and number of connections available to the user and more in particular the present invention relates to a push-in outlet system featuring an interface 11 and a functional module comprising corresponding mating connections in a central vertical plane A.
