Abstract (en)

[origin: WO2015114233A1] The invention relates to a device for attaching ribbon bars (3), representing decorations, onto clothing. Said device is characterized in that it is made up of a set of rods (1, 2) comprising two types of rod, capable of being assembled with each other so as to obtain a modular element that is capable of receiving a series of ribbon bars (3) and attachable onto clothing by means of pins (6), namely: basic rods (1), provided on the edges thereof with a series of tabs (4) and recesses (5) arranged in alternation with one another, from one edge to the other, so as to enable two basic rods (1) to interlock with each other; and linking rods (2) that are intended to receive ribbon bars (3) and enable assembly of two basic rods (1), interlocked with one another, via positive connection means.
