Abstract (en)
[origin: WO2015113085A1] The invention relates to a display system (1) comprising a carrier system (2) and possibly at least one transporting and display container (3), in particular a swing-action fruit and vegetable container, wherein the carrier system (2) comprises a foldable carrier ring (4) having side walls (5) made of panels, in particular multi-skin sheets, having a base region and cover region (6,7) and having at least one folding region (8), and also comprises at least one stabilizing element (9), wherein the at least one stabilizing element (9) has at least one fixing device (10), by means of which the stabilizing element (9) can be fixed to the side wall (5) of the foldable carrier ring (4) in the base region and/or in the cover region (6, 7), and the stabilizing element (9) of the carrier system (2) carries the possibly at least one transporting and display container (3).
