Abstract (en)
[origin: CN106215407A] A binding interface and a skale plate. The scale plate (7, 7') is used for indicating length scales (7a, 7a') on shoe sole in the length range of the shoe sole and is detachably mounted on the binding interface (1, 1', 1'') in the groove (5, 5') in the longitudinal direction of a ski board. The binding interface is used for ski board fastener gripping jaw on an upper surface of the ski board. The scale plate (7, 7') is formed from elastically-deformable plastic film, of which the length scales (7a, 7a') on shoe sole in the length range of the shoe sole is formed on at least one surface.
