Abstract (en)
An image forming apparatus includes a placement portion that include a first surface (20a) on which a medium is placed and a protruding portion (26), a feed roller (22a) that opposes the placement portion, a second surface (23a) that forms an obtuse angle with the first surface, and a restriction portion disposed downstream of the feed roller (22a) in a conveyance direction on the placement portion and that restricts movement of the medium to a predetermined direction. The protruding portion (26) is disposed between the feed roller (22a) and the restriction portion.
