Abstract (en)

[origin: WO2015114044A1] A modular system comprising two or more modules, wherein each module (1) is delimited by one or more side surfaces (2) and has at least one magnet chamber (3) with a magnet body (4) provided in the magnet chamber (3), wherein the magnet body (4) is provided rotatably in the magnet chamber (3), and wherein the magnet body (4) has a shell surface (7) in the shape of a rotary body or cylinder, characterized in that the magnet body (4) has a greater dimension (9) along the rotary body axis (8) than perpendicular to the rotary body axis (8), such that the magnet body (4) has an elongate form, and in that the magnet body (4) has two poles (10, 11) of different magnetic polarity, said poles extending adjacent to one another along the rotary body axis (8).
