Abstract (en)
[origin: WO2015119506A1] A connecting device (1) between a controlling first bicycle (2) and a second bicycle (4), in which a supporting frame (6) connects the first bicycle (2) to the second bicycle (4) and in which a steering rod (12) is directly or indirectly connected between the front-wheel suspension (16) of the first bicycle (2), which is rotatable around a first steering axis (20), and the front-wheel suspension (22) of the second bicycle (4), which is rotatable around a second steering axis (28), the connecting device (1) including a gravel rod (32) which is connected between the front-wheel suspension (16) of the first bicycle (2) and the front-wheel suspension (22) of the second bicycle (4), and the steering rod (12) being in front of the second steering axis (28) relative to the direction of travel, and the distance of the gravel rod (32) relative to the second steering axis (28) being different from the distance of the steering rod (12) relative to the second steering axis (28), the length of the gravel rod (32) being restrictedly variable during use.
